FOR EARLY SPRING BRILLIANCY OF BLOOM SINGLE AND DOUBLE EARLY TULIPS ARE UNSURPASSED

Few, if any, of the spring-blooming flowers rival these Early Tulips for brilliancy of bloom or ease of culture. They are excellent subjects for formal beds on the lawn and for garden borders. Favorites for growing in pots or pans for indoor bloom because of their earliness and dwarf compact growth. Being dwarf and compact, they are exceptionally well suited for planting in front of broad, low houses of modern design. Height 10-12 inches. They allow you to have Tulips in bloom over a longer period because they bloom before the Darwins show color.

PARK'S LAWN GRASS SEED

FALL PLANTING IS BEST. The best time to start or repair your lawn is during the cool weather of early fall. Seed sown from August 15 to Oct. 15 invariably grows well; thicker turf develops quickly under the influence of autumn rains and cool nights. You will have fewer weeds, and a deeper root system. Dormant seeding after November 15 also gives good results. The rate and beauty of growth will depend upon the richness of the soil, good preparation, fertilization, careful planting and moisture until it becomes established after which it needs only reasonably good care to last for years.

FOR NORTHERN LAWNS full sun or light shade. **TURF MAKER 38.** Composed of the strongest, finest and most permanent grass varieties, including Bent. Under favorable conditions it will produce a deep-rooted turf, luxuriant, carpet-like and emerald-green from early spring through summer to early winter. ½ lb. 75c; 1 lb. \$1.40; 3 lbs. \$4.15; 5 lbs. 6.80 Postpaid.

TRUE SHADE. For growing in shady places, under trees, etc., where grass usually does not thrive. ½ lb. 80c; 1 lb. \$1.50; 2 lbs. \$2.90; 5 lbs. \$7.10.

FOR SOUTHERN LAWNS

SOUTHERN EVERGREEN. Carefully formulated from the best grasses for this area. Will give a year-round carpet of green if seeded in the fall on well prepared, well fertilized and limed soils, and given moisture as required. 1 lb. 85c; 2 lbs. \$1.65; 5 lbs. \$4.00; 10 lbs. \$7.50 Postpaid.

SOUTHERN SHADY. Same price as Southern Evergreen. **PERENNIAL RYE GRASS Blue Tag Certified.** Deeper green and of better shape than regular domestic Rye Grass, this premium strain will survive the summer and give a fine winter lawn in sun or shade for a number of years. 1 lb. 45c; 3 lbs. \$1.25; 5 lbs. \$2.00; 10 lbs. \$3.75 Postpaid.

DOMESTIC RYE GRASS. For beautiful winter lawn. Scratch seed in Bermuda sod each fall for the most easily kept Southern lawn. 10 lbs. sows 1,000 sq. ft. 1 lb. 35c; 5 lbs. \$1.25; 10 lbs. \$2.25 Postpaid.

Golden autumn days for planting
Stored up beauty in our gardens,
Then, when by nature's magic,
Cradled seeds and bulbs are tended,
Softly hushed by wind and rain,
Gently coaxed by warming sun,
Kissed by early morning dewdrops,
The modest and the flaunting flowers
Bring gay music to our hearts.

PARK'S GUARANTEE.—We guarantee our seeds and bulbs to the full extent of the purchase price to be true to name and sure to grow under favorable conditions. We will always do more than fair dealing demands to give you satisfaction. Because weather conditions and other things over which we have no control sometimes cause crop failures, it is agreed that in no case shall the Geo. W. Park Seed Co. be liable for more than the original purchase price. In case plants are damaged in transit, we must be notified within 10 days.

DEAR FRIENDS,

We're delighted to be able to show, to some extent, the beauty which can be yours, on the covers of this catalog. We do not pretend that the pictures do justice to the real flowers, but they do bring to mind the lovely effects you can have by using these most easily grown Dutch bulbs in your Garden.

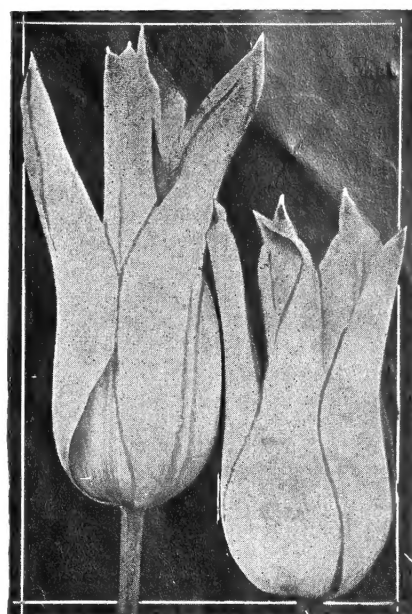

Although it's fall, we greet you as a breath of spring, gently warming the chill air, invigorating spirits, bringing new life into growing things, and such a greeting is not out of place, for we are at the same time urging you to plant our fine quality Holland grown bulbs. They'll greet you, gloriously, for us, with the first breath of spring.

You'll find the quality of our bulbs unsurpassed—We guarantee them to bloom for you—and our prices—well, check them against any other reliable dealer's—they're "rock bottom" and a welcome thought that it is in times like these.

Park's Dutch Bulbs then, are the buy of the year. You can't eat them, but meat and potatoes leave something lacking, which we feel, is likely nourishment for the soul, so amply provided in these glorious blooms. Perhaps it was Confucius who said "If I had two loaves of bread, I'd sell one and buy a white Hyacinth to feed my soul." Things are far from that bad in this country but certainly we do need more food for the soul, and perhaps the beauty of God's creation to be found in the garden, is what more of us need.

We'll look forward to hearing from you. It will be a pleasure to serve you, especially since reports from our growers indicate that we'll have extra fine bulbs for you. You'll like our service too, and perhaps even appreciate this gentle reminder, if because of it, you plant these lovelies in your garden. For, they'll burst forth into glorious color thrilling you to your toes and bringing the good springtime with them too.

Floricordially yours,
GEO. W. PARK SEED CO.

1495A—ROGGLI'S GENUINE ORIGINAL SWISS GIANT PANSIES MIXED.

Do not confuse this with the "Roggli" strain offered below which is several generations removed from the original. Since it was originally offered it has become the standard others attempt to attain, but the Roggli's have continued to improve it and it is still the finest to be had in the world today. Huge flowers are produced on long erect stems. The color range is superb. There is a tendency toward the handsome deeper tones of red and blue, but it is well balanced with lighter yellows, whites, light blues. 60 seeds 25c; 300 seeds \$1.00; 1/32 oz. (about 800 seeds) \$2.00; 1/16 oz. \$3.75; 1/8 oz. \$6.75; 1/4 oz. \$12.

GIANT PANSIES A PARK SPECIALTY

Pansies are well and favorably known, so that a description of their exquisite beauty, and usefulness in the garden is unnecessary. They are simply indispensable, and if we were to name a half dozen of our best seedling flowers, the Pansy would be one of them. There is, however, much difference in the strains, some being greatly superior in vigor and free-blooming quality to other plants as well as the great size, form, variety, and richness of colors and variations. We are pleased to say that the seeds we offer are from Pansy specialists, all of the new crop, and cannot be surpassed in quality, regardless of claim or price.

PARK'S PERENNIAL FLOWER SEEDS

for Permanence and Charm

These are valuable subjects of the flower garden, as most of them are not only showy and beautiful when in bloom, but will do service year after year for a long period, enduring cold, excessive rain and drought, regardless of neglect and improper attention.

Directions for making outdoor beds and sowing seeds are sent with every order.

Hp. HARDY PERENNIALS are hardy plants which will live and bloom every year for a long period. Plants grow to the flowering stage each year and die down again to the roots which remain alive but dormant until the next season. They are very valuable for borders and cut flowers, and once established require less care than the annuals.

Hb—HARDY BIENNIALS are those which bloom the second year from seed, then die. For a continuous display of this type, seed must be sown every year.

Sowing Perennial Seeds

In the North perennial seeds may be sown advantageously in June and July, or later in coldframe or hotbed. See that the seedbeds do not dry out and that the sun does not shine directly upon them. In states extending southward, the beds should be prepared in summer and let stand until the latter part of August or September when sowing should be done.

To prepare the seed-bed dig up the soil to a depth of 2 feet, thoroughly incorporate well rotted compost and rake over several times. Saturate with water and allow to stand until weed and grass seeds spring up and are destroyed before planting.

When ready to plant, rake over the prepared seed-beds carefully to loosen the soil. Sift a 2" layer of mixed loam and well rotted compost over the top. Press the beds firm. Water thoroughly and let stand until the following day. Now, press shallow rows with the angled edge of a board and sow the seeds evenly and thinly.

Cover small seeds scantily, if larger cover twice the depth of their thickness with sifted soil. After sowing, water carefully and thoroughly with a fine spray. Cover with light boards that will shed the rain. Remove these coverings as soon as the seeds begin to sprout. Each day the beds must be watered thoroughly. As soon as the seedlings appear turn the boards up and support so as to protect the beds from direct rays of the sun. For winter covering, a 6" layer of straw, hay or manure is used in order to protect the plants.

ANNUALS for FALL SOWING — Nature's Way

Fall Sown, these produce Sturdier Plants, Earlier Bloom, Longer Stems.

The purpose in fall planting is not to germinate the seed in Autumn, but to get the seed in place, ready to grow with the first favorable weather of spring. Plant slightly deeper than in spring. Protect the sides of beds with boards to prevent washing seeds away. Apply a protective mulch as soon as the ground freezes. Ideal planting time is just before the ground freezes.

From Philadelphia southward—Larkspur may be sown in September so that the seeds may germinate in the fall. With a protective mulch after the ground freezes, they will live over winter, and give extra early long stemmed flowers. From Washington D.C. southward, Sweetpeas too can be handled this way. From Southern Virginia southward add to these Antirrhinum, Dianthus, Phlox, Poppy, Calendula.

Daffodils or Narcissi

Daffodils are the first of the major garden flowers to bloom in the spring. Doubly precious because they bring with them the joyful spring. Because so many of the hundreds of varieties of Daffodils so nearly duplicate others, we have chosen to offer a representative variety of each class and color. These have been chosen through study in our own trial grounds and close cooperation with several leading Dutch and American growers, and we can without reservation recommend each variety we offer as one of the best in its class and color.

I wandered lonely
as a cloud
That floats on
high o'er vale
and hills

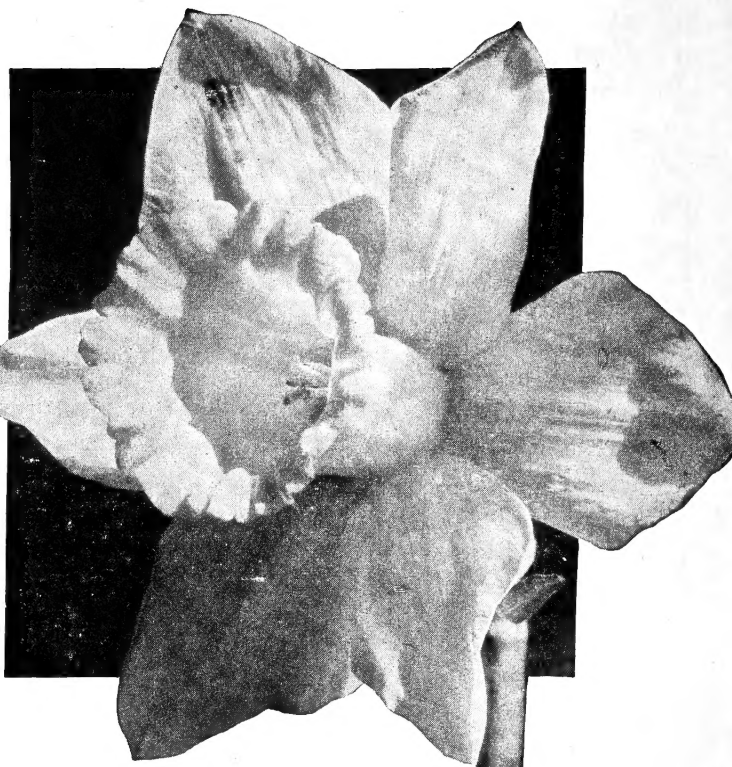

When all at
once I saw
a crowd

A host of gold-
en daffodils

Beside the lake,
beneath the
trees,

Fluttering and
dancing in the
breeze.
